

# Half inner tent and half floors

## When half is enough

### Half inner tent

To provide privacy inside the tent, we have developed a half inner tent with integrated floor in Comfort grade.

The inner tent has two fresh air intakes and need not be detached when packing the tent. If you want to remove it, it is easily detached from its quick fastenings. For extra comfort inside the rest of the tent, it can be combined with a half floor or a half fleece floor.

### Half inner tent key features

- Protects against condensation which is especially important for Nordic tipis made of lightweight material
- Creates privacy inside the Nordic tipi
- Provides a weather-protected place for wood, packing and wet shoes outside the inner tent
- Offers even more reliable protection against insects

IT Solo pitching kit is used for putting up the inner tent on its own, that is, without a Nordic tipi. Practical in warm conditions although it is not rainproof or storm-resistant.

### Half floor

If the Nordic tipi is used with a half inner tent and you still want to have a floor on the rest of the living area, we also offer a half floor in Comfort grade. Without an inner tent, two half floors can be joined together with Velcro to make a whole floor.

To make a fire in the tent, you can fold away the floor by opening the zip in the middle. The zip also makes it possible to remove quarter of the floor to create an uncovered space for dirty shoes, firewood, etc.

Our half floor can also be combined with a half fleece floor.

### Half fleece floor

Our fleece floor has a cosy surface, even for bare skin. It is fully damp-resistant, like all our other floors. You can join two half fleece floors together with Velcro to make a whole floor.

Our half fleece floor can also be combined with a half ordinary floor.

### Half floors key features

- Fitted with a zip cover which protects the zip from dirt
- Lies flat and smartly stretched with the help of a tensioning device
- Can be combined with a half inner tent, a half floor or a half fleece floor

Combine floor halves or quarters and join together with the Velcro.
