

Key features

- Room to sleep two people plus dog; four people can sit and socialise
- All storage inside the tent
- Simple adjustment of the ventilator cap, even from the sleeping bag, thanks to our In-Tent Vent™ ventilation system
- Storm cords with reflecting threads woven into the cords; pre-tied and fitted with holders that prevent cords from tangling
- Built-in and raisable snowflap, making the tent suitable for use in any season
- Better run-off of condensation on the tent walls compared with other types of tents thanks to the incline of the walls; drops that may fall off are captured by our impregnated inner tent (included in Combi but can also be purchased separately)
- No bows that can break; easy replacement or repair of central pole with material from nature
- Straps instead of cords for stretching the tent
- Microstove chimney outlet through opened ventilator cap (applies to Olivin light without inner tent); special ventilator cap with a chimney opening included with Olivin cp
- Well-ventilated inner tent (applies to Combi) that is pitched together with the outer tent; can also be used separately, for example when insect protection is the main priority
- Large, mosquito-netted ventilation openings in the inner tent for better natural ventilation
- Robust floor material (applies to Combi) that stops ground damp; an inner tent with integrated floor or a separate floor is available as an optional extra

With three different Olivin 2 designs – an ordinary Nordic tipi without an inner tent made of cotton/polyester or lightweight material and a combi model consisting of outer and inner tent made of lightweight material – we have reached our goal of creating the strongest, most spacious and ingenious tent in the small peak tent category.

Like our other Tentipi® tent models, Olivin has an elaborate and clever construction. Several smart features have been taken from our larger Nordic tipis. Olivin 2 is more durable than a two-man tent where priority has been given to low weight. The Nordic tipi is exceptionally stable in strong winds and in an emergency, a small open fire can be lit inside the tent.

Breathable – Cotpolmex Comfort

Highly breathable and strong cotton/polyester fabric, creating a much better internal atmosphere than is normally experienced in tents. The tightly woven fabric and high class impregnation give high water repellency.

Non-breathable – Traillix Comfort

Lightweight ripstop polyamide fabric. UV-protected and silicone-coated on both sides. A carefully chosen, light and very fine standard fabric.

Olivin			
Tent model	2 cp	2 light	2 Combi
Inner tent included	No	No	Yes
Weight (kg)	6	1.9	3.4
Weight of inner tent (kg)	-	-	1.5
Diameter of inner tent (m)	-	-	2.8
Height of outer tent (m)	1.7	1.7	1.7
Pack size (cm)	50x24	41x15	41x19
Number of people, sleeping	2		
Number of people, sitting down	4		

Tentipi

- has its roots in Swedish Lapland – the homeland of the Sami káta
- stands for passion and expertise, especially when it comes to Nordic tipis
- has three decades of experience as the world-leading manufacturer of Nordic tipis
- has several patents and design rights for its original, ingenious design
- cares so deeply about its products that it only makes its Nordic tipis in its own fully-owned factories
- exposes every fifth tent to a full-scale rain test
- views every Nordic tipi as a unique product and gives it a personal ID to make it possible to track its components and specific design
- cares about previous customers by always striving to make new features also fit the older models of tents.

Why people choose Tentipi®

Because they think it is worthwhile investing extra money in order to get a superior product.

Because they believe that Tentipi's sole focus and passion for Nordic tipis give a better functioning and more reliable Nordic tipi.
