

Event mattress 188/70 complete

Spring mattress for first-class comfort

Tentipi 
authentic nordic tipis since 1989

We have developed our own mattress so as to be able to offer much better comfort that is normally associated with sleeping in a tent.

The Event mattress consists of three parts: an all-enveloping cloth cover, a soft sleeping mat and a spring mattress. The sleeping mat has been carefully tested to ensure it withstands wear against the galvanised springs of the bottom mattress.

The upper side of the cover is made of top-class, strong cotton/polyester cloth. The bottom side is made of a durable, waterproof fabric. Air circulating inside the Nordic tipi is able to pass through the ventilating net along the sides of the mattress. The net also prevents any damage from damp during storage.

The Event mattress has a zip along three sides for easy fitting. It also has a practical carrying handle on one of its long sides.

Measurements: 188x70x10 cm. Weight: 6.8 kg.
