

# Hammock cp

Because you're worth it

The Tentipi Hammock is made from the offcuts of fabric generated by our factories. Rather than becoming waste, the offcuts become useful again. This means that the pattern as well as the weight slightly varies from hammock to hammock. There is a buckle strap in each end to be able to mount the hammock just about anywhere. On one side there is a pocket to store your book, your phone, your water bottle etc.

Dimensions: 300x133 cm. Weight: approximately 2.2 kg.
