

## **Packing bag for WallFlex**

Practical storage for WallFlex walls

A specially designed packing bag which facilitates the transport and storage of WallFlex walls.

All WallFlex walls, especially those with PVC windows, are best stored rolled up. This helps to keep the windows smooth and the walls clean while minimising the risk of damage. Each packing bag can hold up to three walls sections depending on the type of wall.

The packing bag is 255x35 cm.
