Cirrus 20 © Tentipi, Sweden – tentipi.com

Cirrus 72, Cirrus 40, Cirrus 28 and Cirrus 20 © Tentipi, UK - tentipi.com

We've designed Cirrus for those customers whose top priority is ease of use. To open the guest entrance, simply undo the two zips and roll up the canvas panel. There's a zippered door opposite the roll-up panel too.

Striking, durable, flexible. Can seat 72, 40, 28, 20 in a stunning setting

Cirrus is extremely flexible. The unique design of this Nordic tipi makes it perfect for glamping. It can be used as a stand for tourist information or at a trade fair, as an assembly hall at a scout camp or as a romantic setting for a wedding party. Up to 72 people can sit at tables around an open fire, eating and having a good time. It can also be used by restaurants that need more space for tables during the summer months.

The Cirrus Nordic tipis have three openings: one serves as a main entrance, the other two as reserve exits. The reserve exits are made with simple zips and the canvas between them can be rolled up, thereby creating an opening that is several metres wide. This facilitates the passing through of large numbers of trade fair visitors. It also gives party guests an excellent view. It could be the starting line for a competition or be furnished with a sales counter where the preparation and storage areas are protected inside the tent. The broad opening also makes it possible to connect a Cirrus Nordic tipi to other Nordic tipis for big events. For instance, Cirrus can be used as a kitchen to serve several connected Stratus 72 Nordic tipis. Or it can be used as an entrance/welcome hall, cloakroom, storeroom, lounge, annexe, etc.

Cirrus™ properties

Cirrus includes

Pole set
Hardware, stakes and straps
Canvas
In-Tent Vent™ system (Pro, ProBudget and Comfort)
Packing bag

Optional extras

Secondary pole set (Cirrus 72)
TipiStar™ (Cirrus 72)

Guidance notes, tips and tricks
Health and safety pack
Photo pack
Floor planning tool
Authentic Nordic Tipis Association
International networking
Spares
Factory repairs
Telephone and e-mail support
And more

OUTSTANDING CANVAS TO KEEP THE RAIN OUT

Pro: Water-repellent, professional-grade fabric. Most of our customers who are active in the public event sector choose Pro.

ProBudget: High-quality, water-repellent fabric.

Comfort: Very strong, high-quality cotton/polyester fabric.

Base: Standard cotton/polyester fabric.

REINFORCED FABRIC

At ground level for increased protection against wear and rot.

Pro | ProBudget | Comfort:
Extra strong reinforced fabric.

AESTHETICALLY PLEASING POLES

Our debarked poles have a delightful natural look, avoiding any artificial staining or colouring common in processed timber. Every pole is unique, as nature intended, an intrinsic part of the character of a Nordic tipi.

SECONDARY POLES

Cirrus 72 can be supplemented with 18 secondary poles. In high wind conditions you really understand the crucial role they play in maintaining stability.

SUSTAINABLE TIMBER AND NO CHEMICALS

We use a specific species of spruce, cut in sustainable forests in northern Sweden. It's immensely strong and flexible and doesn't need unpleasant chemical preservatives to prevent rot.

LAB-TESTED TIMBER

Not all timber is equal. We lab-test ours to measure its various characteristics and feed these figures into our structural calculations. The species of timber and the location in which it is cut are vital.

EASY ASSEMBLY

Pro | ProBudget | Comfort:

Advanced, patented fittings system for fast and easy assembly and high strength.

Base: Simplified fittings system.

VENTILATOR CAP

Pro | ProBudget | Comfort:

In-Tent Vent™ system for simple and effective ventilation and smoke expellation. The ventilator cap is regulated from inside the tent.

Base: The ventilator cap is regulated from outside the tent.

THREE OPENINGS AND A ROLL-UP PANEL

One opening serves as a main entrance, the other two as reserve exits. The reserve exits are made with simple zips and the canvas between them can be rolled up.

WOODEN POLES

Carefully chosen wooden poles from trees that have grown in particularly favourable conditions – unique timber with extreme strength.

Pro | ProBudget | Comfort:

Advanced set of poles.

Base: Simplified set of poles.

STRUCTURAL CALCULATIONS

Tents over 50 square metres mostly require formal calculations. Our calculations cover every configuration of single or linked Nordic tipis.

SEWN IN ONE PIECE

Tipi canvases are usually laced together as it is tricky to sew the last seam. But that creates a weak point and risks water coming in under difficult weather conditions. That is why our canvases are sewn in one piece.

BAND PINS

Our band pins ensure poles are connected safely and efficiently with a tight fit and no protruding components.

STAKES

Our stakes and ground anchors are specially designed for high strength and good functionality.

Swedish design and innovation since 1989

Tentipi was founded in Moskosel, a small village in Swedish Lapland, and is today the world-leading manufacturer of linkable event Nordic tipis. Our Nordic tipis are based on the traditional design principles of the Sami kåta but are made of modern materials and with modern construction methods. Our hope is that you, in a Nordic tipi from Tentipi, will feel the same closeness to the elements of the earth as the indigenous people do.
