Stratus™ is the ultimate in flexibility for a Nordic tipi and can be adapted for all sizes of events, big or small, all year round. Pitch it sides down in a normal tipi shape or raise the sides to create a giant witch's hat, or anything between the two. The raisable sides of the Stratus enables you to link the Nordic tipis – in limitless configurations.

Robust, stylish, tried and tested

Stratus provides weather protection and frames an event in a magical way. When it's cold, the sides are folded down and a fire can be lit in the centre of the Nordic tipi. At trade fairs or when the sun is beating down, the sides are raised up, providing good exposure or shade under the brim. With some of the sides raised, several Stratus tents can overlap each other, creating a larger room of optional shape for a thousand people or more. Being able to raise the sides means one can look out over a nice view.

An experience that people love – and remember!

Our large Nordic tipis grab attention in the most positive way. They make people notice you and remember you. Stratus Nordic tipis are used by adventure venues, hotels, restaurants and glamping sites to create beautiful settings all over the world. One or several tents can be rented to create a spectacular atmosphere for a wedding, party, conference or concert.

Specifications

		Stratus 72 with sides up	Stratus 72 with sides down
Capacity*	Standing	140	80
	Seated 8 per table	128	72
	Seated 6 per table	96	54
Dimensions when pitched**	Diameter (m)	13	10.3
	Height (m)	7.4	7.4
	Covered area (m²)	132	83
Dimensions when packed**	Bundle of poles (m)	8.25 x 0.6 x 0.6	
	Canvas and hardware (m)	1.2 x 0.8 x 0.8	
Weight	(kg)	740	
Build team and build time		3 people 2 hours	
Quality grades		Pro ProBudget Comfort	

*Seating capacity based on Tentipi's 2-metre long tables and benches.

**Dimensions are approximate.

Pro and ProBudget – for public events. High-quality, flame-retardant fabric. The tents of these quality grades are structurally calculated and adapted to comply with safety regulations for public events. A pack of certificates and health and safety documents that are often required by authorities, trade organisations and event organisers is included.

Comfort – for private events. High-quality cotton/polyester fabric.

Stratus™ properties

Stratus 72 includes

Pole set
Hardware, stakes and straps
Canvas
In-Tent Vent™ system
Packing bag
Certificates and health and safety documents

Optional extras

Roof pole set
Secondary pole set
Extra hardware, stakes and straps
TipiStar™
Linking kit
Widening kit
WallFlex™
SmartPitch™
Tent jack Viking
Off-white canvas
Co-branded panels
Repair kit for Event canvas

Business support

Investment planning
FieldReady™ Training Programme (FRTF)
Guidance notes, tips and tricks
Health and safety pack
Photo pack
Floor planning tool
Authentic Nordic Tipis Association (ANTA)
International networking
Spares
Factory repairs
Telephone and e-mail support
And more

CANVAS-FIXING FLAPS

In the upper part of the Nordic tipi, 18 flaps connect the canvas to the main poles. They are crucial for the tent's resistance to strong winds and prevent rotation of the canvas on the frame when the sides are raised.

IN-TENT VENT™ SYSTEM

Ventilator cap regulated from inside the tent. For simple and effective ventilation and smoke expellation.

WOODEN POLES

Carefully chosen wooden poles from trees that have grown in particularly favourable conditions – unique timber with extreme strength.

AESTHETICALLY PLEASING POLES

Our debarked poles have a delightful natural look, avoiding any artificial staining or colouring common in processed timber. Every pole is unique, as nature intended, an intrinsic part of the character of a Nordic tipi.

SECONDARY POLES

Stratus 72 can be supplemented with 18 secondary poles. In high wind conditions you really understand the crucial role they play in maintaining stability.

SUSTAINABLE TIMBER AND NO CHEMICALS

We use a specific species of spruce, cut in sustainable forests in northern Sweden. It's immensely strong and flexible and doesn't need unpleasant chemical preservatives to prevent rot.

LAB-TESTED TIMBER

Not all timber is equal. We lab-test ours to measure its various characteristics and feed these figures into our structural calculations. The species of timber and the location in which it is cut are vital.

IN-TENT VENT™ VENTILATOR CAP

For simple and effective ventilation and smoke expellation.

EASY ASSEMBLY

Advanced, patented fittings system for fast and easy assembly and high strength.

OUTSTANDING CANVAS TO KEEP THE RAIN OUT

Pro: Water-repellent, professional-grade fabric. Most of our customers who are active in the public event sector choose Pro.

ProBudget: High-quality, water-repellent fabric. For public events.

Comfort: Very strong, high-quality cotton/polyester fabric. For private events.

ROOF POLE SET

To completely raise the sides of Stratus, you need a Roof pole set comprising nine roof poles, nine roof support poles and associated hardware.

REINFORCED FABRIC

At ground level for increased protection against wear and rot.

ONE OR TWO DOORS

Normally delivered with two doors but can be ordered with one.

STRUCTURAL CALCULATIONS

Tents over 50 square metres mostly require formal calculations. Our calculations cover every configuration of single or linked Nordic tipis, all sides up, all sides down or some up and some down.

SEWN IN ONE PIECE

Tipi canvases are usually laced together as it is tricky to sew the last seam. But that creates a weak point and risks water coming in under difficult weather conditions. That is why our canvases are sewn in one piece.

BAND PINS

Our band pins ensure poles are connected safely and efficiently with a tight fit and no protruding components.

STAKES

Our stakes and ground anchors are specially designed for high strength and good functionality.

WallFlex™ is made up of four reusable components.
Simple to store, pack and use, whilst maximising your return on investment.
Designed to create multiple effects.

All panels
available with
or without PVC
windows.

Infill panels

Wall panel

Midfill panel

Wooden doors

Wall panel + Infill panels used under a raised brim.
Add 28 % more usable floor area.

Roll up the central panel for an
informal entrance.

Or add wooden doors for a
formal entrance.

The same Wall panel + Infill panels fitted in
the centre of two linked Stratus Nordic tips.

Roll up the central panel for an
informal entrance.

Or add wooden doors for a formal entrance.

Alternatively, cover the link between two
Stratus Nordic tips with a Midfill panel.

Combine WallFlex components to create
dozens of different effects.

3 x Stratus 72 + 2 x Wall panel, 1 x Midfill panel and 1 x Infill panels

Wall panel and Infill panels

A Wall panel and two Infill panels added to Stratus increases the usable floor area by 28 per cent. The tent extension is supported by a series of poles that fit between two raised roof poles. Each Wall panel has a double zip and a roll-up section ideal for an informal entrance or to create trade access. This extension is useful when a customer requires extra space, but might not be able to afford another tent.

Midfill panel

A Midfill panel is designed to fit between the link of two Stratus Nordic tipis. The panel can be folded back to create an informal entrance and can be removed in a matter of minutes.

Pair-to-pair* infill

With the addition of a long ridge pole and a covering canvas, the WallFlex system can also be incorporated into the front of two linked Stratus Nordic tipis. *A way of linking two Stratus tents.

Swedish design and innovation since 1989

Tentipi was founded in Moskosel, a small village in Swedish Lapland, and is today the world-leading manufacturer of linkable event Nordic tipis. Our Nordic tipis are based on the traditional design principles of the Sami kåta but are made of modern materials and with modern construction methods. Our hope is that you, in a Nordic tipi from Tentipi, will feel the same closeness to the elements of the earth as the indigenous people do.
