## AURUM® 33

GLAMPING REDEFINED FOR 2021

Designed and tested in Sweden.  
Crafted using the finest materials available.  
Built on 30 years of Tentipi expertise.

# WELCOME TO THE AURUM® 33

**The long-awaited Aurum 33 glamping Nordic tipi has been years in the making. Aurum is the latin word for gold, as well as *Au* being the periodic symbol for gold and *rum* means 'room' in Swedish. Welcome to Aurum 33, our golden room.**

For the first time we have a dedicated glamping product, drawing on three decades of expertise. The Aurum 33 offers our customers a robust Nordic tipi with unparalleled design, weather-proofing and enviable longevity.

The poles are made from a specific species of spruce, sourced from sustainable forests in northern Sweden, and lab tested to prove structural integrity. Aurum is available in two different materials. Our custom-made Pro fabric has been tried and tested for many years in our Event tents. It is flame-retardant to meet international standards and provides the best weather-proofing and UV resistance. Aurum is also available in our new Base FR fabric, a fabric we strongly believe in, which is flame-retardant and has a lower price.

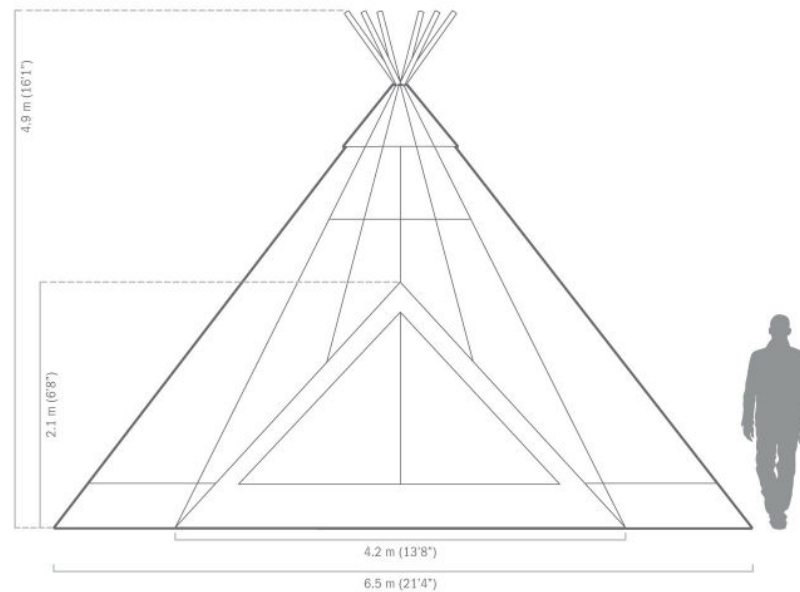

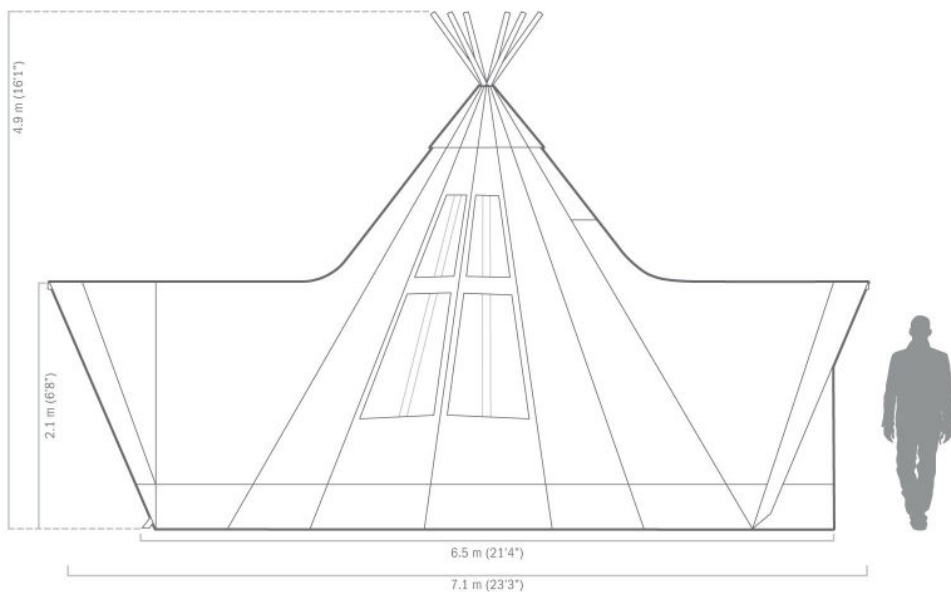

Ventilation in the Nordic tipi is managed via our carefully designed and well-proven In-Tent Vent™ system. The tent can be fitted with an optional ventilator cap with a chimney opening, allowing easy installation of a wood burning stove for year-round glamping.

Two porches, at opposite ends of the Nordic tipi accommodate spacious entrances which provide lots of natural light and increased ventilation. Six windows and four clear porch panels maximise the light available. They are all fitted with interior curtains for privacy.

**WELCOME TO A NEW WORLD OF GLAMPING**

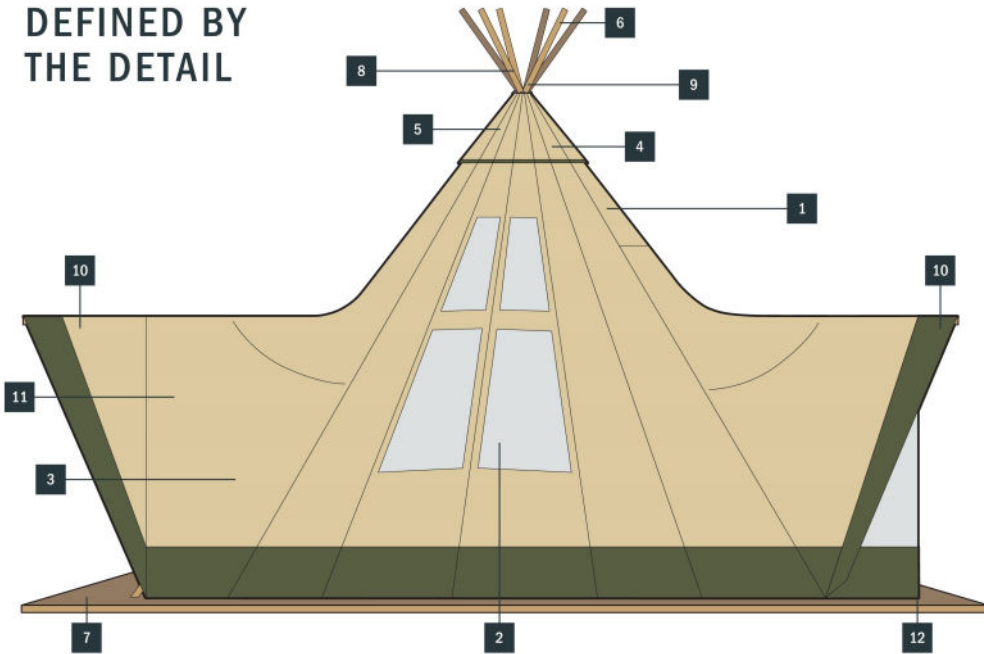

AURUM 33		
Capacity	<b>Sleeping</b>	2-4
	<b>Sitting</b>	12
	<b>Standing</b>	15

	<b>Canvas &amp; hardware</b>	1.2 m (3'11") x 0.8 m (2'7") x 0.3 m (1')
Weight		250 kg (550 lb)
Build team and times		2 people 2 hours

## DEFINED BY THE DETAIL

**1** **OUTSTANDING CANVAS TO KEEP THE RAIN OUT**  
Our custom made canvas took three years to develop. It has much better water repellent properties than the best off-the-shelf canvas we've ever found.

**4** **IN-TENT VENT™**  
Our In-Tent Vent ventilator cap allows guests to adjust the temperature and ventilation of the tipi from inside the tent. Optional insect net available.

**7** **FLOORING**  
The Aurum 33 is available with an optional integrated floor. This is attached using Velcro to deter bugs and eliminate moisture from the ground.

**10** **PORCHES**  
Two porches sit at opposite sides of the tipi providing practical entrances, flexible ventilation and lots of natural light through clear porch panels. Each is fitted with an adjustable curtains for privacy.

**2** **WINDOWS**  
The Aurum 33 comes with six windows and four clear porch panels to allow lots of natural light in. Each is fitted with an adjustable canvas panel for privacy.

**5** **STOVE COMPATIBLE**  
Designed for use with a wood-burning stove. You can choose a specifically designed, weather proof, stove pipe opening in the cap. Installation must be carried out by a qualified professional.

**8** **LAB-TESTED TIMBER**  
We lab-test our timber to measure its various strength characteristics. The species of timber and the location in which it is cut are vital to this strength.

**11** **FIRE RETARDANT FABRIC**  
The fire retardant properties of the fabric do not degrade over time, so you won't need to reproof or replace it to meet regulations. Our canvases are manufactured to comply with relevant international standards.

**3** **SEWN IN ONE PIECE**  
Rather than using the easier method of lacing, all of our tipi canvases are sewn in one piece. By doing so we avoid the leak risks associated with the lacing method.

**6** **AESTHETICALLY PLEASING POLES**  
Our de-barked poles have a beautiful natural look, avoiding any machining or artificial staining common in processed timbers. Every pole is unique, as nature intended, an intrinsic part of the character of a tipi.

**9** **SUSTAINABLE TIMBER AND NO CHEMICALS**  
Due to its immense strength, the specific species of spruce we use for our poles does not require the use of unpleasant chemicals to prevent rot.

**12** **STAKES AND GROUND ANCHORS**  
Ground anchoring options are available for soft or hard ground and decking. Our stakes are cast in a single piece to ensure the head can't fall off.

*"Great products are defined by their details. When you are out there in the wind and the rain the details matter."*
